*Adjusted EBITDA is a non-GAAP measure that management uses to evaluate the performance of the company. Adjusted EBITDA, as we define it, is operating income from continuing operations adjusted for depreciation, depletion, amortization, pension and postretirement costs not allocated to business segments (primarily interest cost, expected return on plan assets, amortization of actuarial loss and amortization of prior service cost/ credit), special items and discontinued operations. Adjusted EBITDA should not be considered in isolation from and is not intended to represent an alternative to our GAAP results.

[^0]:    * Non-GAAP measure - see page 8 for definition.

[^1]:    ${ }^{(1)}$ Volumes include sales of internally produced products and products purchased for resale primarily through our distribution business.
