## WEYERHAEUSER

Farnings Release - 4th Quarter 2011

## FORWARD-LOOKING STATEMENT

This presentation contains statements concerning the company's future results and performance that are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements are based on various assumptions and may not be accurate because of risks and uncertainties surrounding these assumptions. Factors listed below, as well as other factors, may cause actual results to differ significantly from these forward-looking statements. There is no guarantee that any of the events anticipated by these forward-looking statements will occur. If any of the events occur, there is no guarantee what effect they will have on company operations or financial condition. The company will not update these forward-looking statements after the date of this news release.
Some forward-looking statements discuss the company's plans, strategies and intentions. They use words such as "expects," "may," "will," "believes," "should," "approximately," "anticipates," "estimates," and "plans." In addition, these words may use the positive or negative or other variations of those terms.
This release contains forward-looking statements regarding the company's expectations during the first quarter of 2012, including increased fee harvest volumes in the West, slightly improved average selling prices due to a higher percentage of export logs sold to Japan, flat fee harvest volume and prices in the South, higher fuel costs across all geographies, higher silviculture expenses in the South, and slightly higher earnings in the Timberlands segment excluding earnings from disposition of non-strategic timberlands; increased sales and slightly higher selling prices for lumber, higher sales volumes and over five percent increase in selling prices for oriented strand board, increased sales volumes and flat prices for engineered wood products, higher log costs in the South and Canada and lower log costs in the West, higher operating rates across all product lines, and a smaller loss from continuing operations in the Wood Products segment excluding special items; considerably lower average selling prices for pulp and slightly lower shipment volumes, significantly higher maintenance costs and lower production due to scheduled annual maintenance outages, higher energy and chemical costs, and substantially lower earnings in the Cellulose Fiber segment; seasonally lower home closing volume, lower average selling prices and margins due to mix, and a loss from single-family homebuilding operations in the Real Estate segment. Major risks, uncertainties and assumptions that affect the company's businesses and may cause actual results to differ from these forward-looking statements, include, but are not limited to:

- the effect of general economic conditions, including employment rates, housing starts, interest rate levels, availability of financing for home mortgages, and strength of the U.S. dollar;
- market demand for the company's products, which is related to the strength of the various U.S. business segments and economic conditions;
- performance of the company's manufacturing operations, including maintenance requirements;
- the successful execution of internal performance plans, including restructurings and cost reduction initiatives;
- the level of competition from domestic and foreign producers;
- raw material and energy prices and transportation costs;
- the effect of design value changes on demand for the company's Southern yellow pine lumber;
- the effect of forestry, land use, environmental and other governmental regulations;
- federal tax policies;
- legal proceedings;
- the effect of timing of retirements and changes in the market price of company stock on charges for stock-based compensation;
- the effect of weather and the risk of loss from fires, floods, windstorms, hurricanes, pest infestation and other natural disasters;
- changes in accounting principles;
- performance of pension fund investments and related derivatives; and
- other factors described under "Risk Factors" in the Company's annual report on Form 10-K and quarterly reports on Form 10-Q.

The company also is a large exporter and is affected by changes in economic activity in Europe and Asia, particularly Japan and China.
It is affected by changes in currency exchange rates, particularly the relative value of the U.S. dollar to the euro and the Canadian dollar and the value of the euro to the yen. Restrictions on international trade or tariffs imposed on imports also may affect the company.

## STATEMENTS RELATING TO NON-GAAP FINANCIAL MEASURES

- During the course of this presentation, certain non-U.S. GAAP financial information will be presented. A reconciliation of those numbers to U.S. GAAP financial measures is included in this presentation which is available on the company's website at www.weyerhaeuser.com

## Comments

- Increased fee harvest volumes in the West, and slightly improved average selling prices due to a higher percentage of export logs sold to Japan
Timberlands

## Wood

- Flat fee harvest volumes and prices in the South
- Higher fuel costs across all geographies, and higher silviculture expenses in the South
- Excluding earnings from disposition of non-strategic timberlands, expect 2012 Q1 earnings to be slightly higher than 2011 Q4
- Increased sales volumes and slightly higher selling prices for lumber
- Higher sales volumes and over 5\% increase in selling prices for oriented strand board

Products

- Increased sales volumes and flat prices for engineered wood products
- Higher log costs in the South and Canada, and lower log costs in the West
- Higher operating rates across all product lines
- Excluding special items, expect 2012 Q1 loss to be smaller than 2011 Q4 and similar to 2011 Q1
- Considerably lower average selling prices for pulp, and slightly lower shipment volumes

## Cellulose

 Fibers- Significantly higher maintenance costs and lower production due to more scheduled annual maintenance
- Higher energy and chemical costs
- Expect 2012 Q1 earnings to be substantially lower than 2011 Q4
- Seasonally lower home closing volume

Real Estate - Lower average selling prices and margins due to mix

- Excluding any earnings from potential land sales, anticipate a loss from single-family homebuilding operations in 2012 Q1

## APPENDIX

## PRO FORMA EARNINGS PER SHARE

- On Sept. 1, 2010, Weyerhaeuser paid a previously announced special dividend consisting of approximately 324 million shares of common stock and $\mathbf{\$ 5 6 0}$ million in cash.
- After payment of the special dividend, Weyerhaeuser had approximately 536 million basic shares outstanding.
- The following table sets forth a pro forma EPS as if special dividend shares had been outstanding.
