Unallocated items are gains or charges not related to or allocated to an individual operating segment. They include a portion of items such as: share-based compensation; pension and postretirement costs; foreign exchange transaction gains and losses associated with financing; and the elimination of intersegment profit in inventory and the LIFO reserve.

${ }^{(1)}$ We began reporting the elimination of intersegment profit on inventory and the LIFO reserve in Unallocated Items in second quarter 2012. Previously these company-level adjustments were recorded in the business segments. This provides a better understanding of business operating results. Prior period results have been adjusted to reflect the change.

*Adjusted EBITDA excluding special items is a non-GAAP measure that management uses to evaluate the performance of the company. Adjusted EBITDA excluding special items, as we define it, is operating income adjusted for depreciation, depletion, amortization, special items and interest included in cost of products sold. Adjusted EBITDA excluding special items should not be considered in isolation from and is not intended to represent an alternative to our results computed under GAAP.

[^0]:    ${ }^{(1)}$ Volumes include sales of internally produced products and products purchased for resale primarily through our distribution business.
